

Instructions on Washing Tie-Dyes

1. Tie-dye creations should sit for at least 12 hours before rinsing/washing, though they can sit longer if you'd like the color to be stronger, or shorter if you like a more faded look
2. Wear gloves (kitchen or surgical type) & old clothes or an apron
3. Remove the tie-dye from the bag and rinse under hot water for a few minutes, allowing excess dye to run-off. After a few minutes, remove rubber bands or string and continue to rinse and squeeze tie-dye to remove excess dye. When the water runs off and is mostly dye free (clear) you can stop rinsing, and place it in the washer
4. Put tie-dye (alone) and soap into the washer and proceed to set your washer to your normal settings for colors-- use HOT water with a COLD rinse
5. You should wash the tie-dye alone a second time, COLD wash (with soap) and COLD rinse
6. Place item(s) in dryer, (best on cotton setting)
7. Tie-dyes can now be washed with your color items in your normal wash!

Spiders, Black Spirals (anything with all black on one side) should be laid black side down

Remember to keep tie-dye creation "flat like a pizza" when letting it sit
